

Sustainable Agriculture

The challenges of meeting future food, fiber, and fuel needs—while protecting natural resources, managing profitable businesses, and supporting our communities—are upon us. While combining hands-on production skills with expertise in business management, you can build a career in agriculture that fosters environmental, economic, and social sustainability. Career options include crop and livestock production, supply chain management, education, advocacy, and more.

The business skills emphasized in our program are an important part of success in any career area, particularly in effective agricultural enterprises.

IAA Students Receive:

- **In-depth courses** about crops, livestock, soils, fertilizers, etc.
- **Management education** directed toward sustainable agricultural careers.
- **Hands-on learning** inside and outside the classroom.
- **Networking** with industry professionals.
- **An affordable education** supported with scholarships and financial aid.
- **An academic community** with rich resources.

How to Apply:

Apply for admission to the IAA at the University of Maryland and select the **Sustainable Agriculture** specialization.
